

Lunar360° 3-Head LED Flood Lighting

With Tripod or Magnetic Bracket

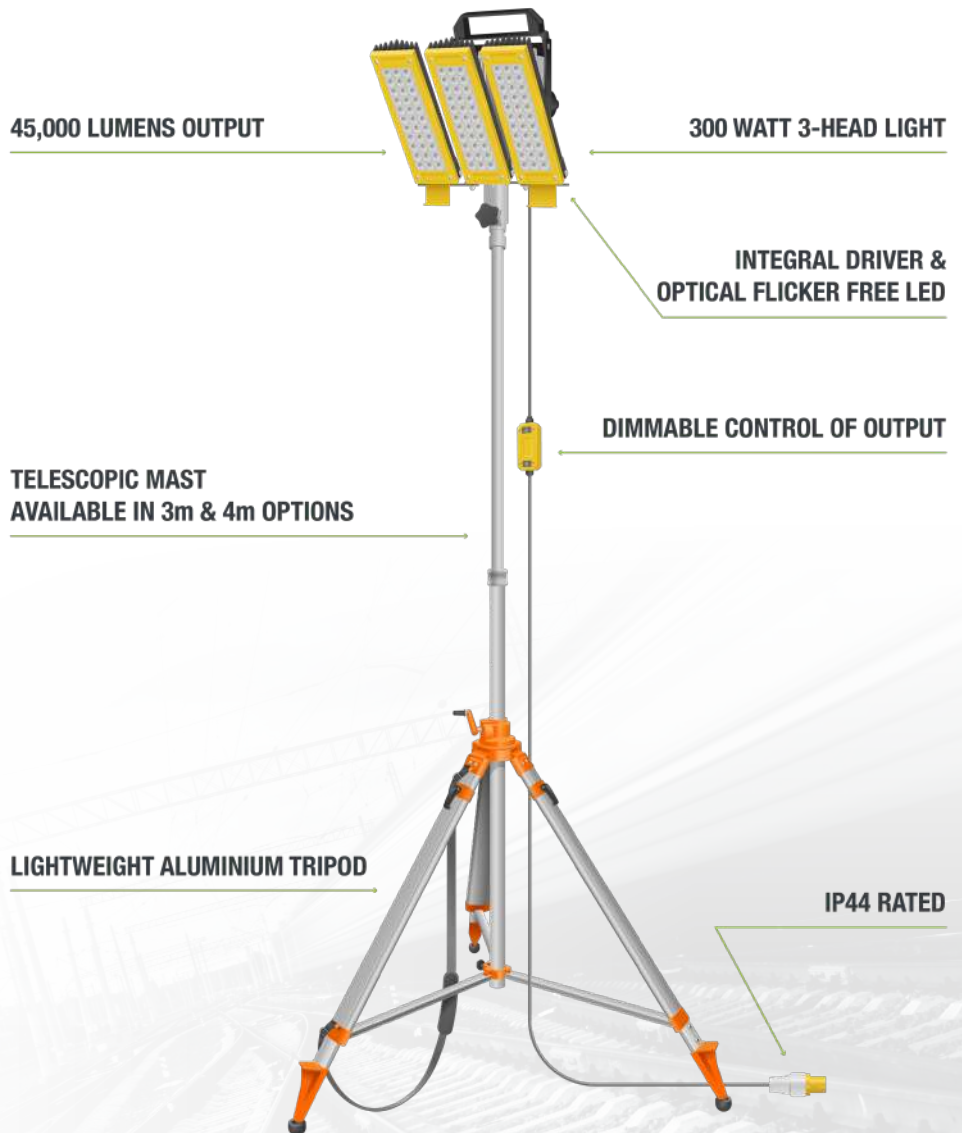

Overview

The NEW Lunar360° 3-Head LED flood light and tripod system provides a cost effective, portable and sustainable lighting solution for the rail, civil, construction, utilities and events industries.

300 watts of power providing 45,000 Lumens of light and when powered using a single Vitacell® battery power source this Lunar360° will run for up to 17 hours on the highest power setting.

The Lunar360° 3-Head flood lighting system when used alongside our Vitacell® rechargeable battery is fuel free, silent running and has zero carbon emissions which are key drivers for many businesses.

Our Lunar360° has flicker free light heads which are water and dust proof. They can be mounted using either the 3m or 4m telescopic tripods, attached to a rail trolley or fixed to masts or a vehicle side using the magnetic bracket.

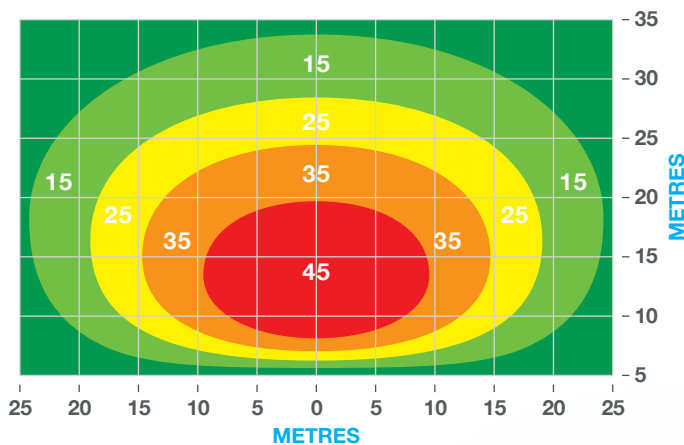

Key Benefits

- ▶ Lightweight and compact
- ▶ Flexible floodlight solution 360° or 180°
- ▶ Zero emissions and zero noise output (when used alongside Vitacell® battery)
- ▶ 4 x Tripods can be linked together to provide a greater surface area of light output
- ▶ Dimmable control of light output when used alongside the Vitacell® battery
- ▶ High performance integral driver and optical flicker free LED technology
- ▶ Low transport costs
- ▶ 600 or 300 watt light head option
- ▶ Magnetic bracket available

Specifications

Rated voltage	110 V
Rated wattage	3x 100 W
Ingress protection	IP44
Total lamp lumens	45,000 lm
LED lifespan	20,000+ hours
CE compliant	UK CE marked UKCA
Lamp CCT	6500 K
Rated temperature	50°C
Luminaire weight	9.5 Kg
Tripod weight	11 Kg
Tripod height	3.0m or 4.1m

Light Plot

Magnetic Bracket

A Lunar360° 3-Head powered using a single Vitacell® battery will run for up to 17 hours on the highest power setting.
